

YASHAS D

AI & Data Engineering Student — Analytics, ML Pipelines & Risk-Aware Systems

+91-6363654928 | yashasd011@gmail.com | linkedin.com/in/yashas-d | github.com/YashasD11

PROFESSIONAL SUMMARY

Data analytics and finance-focused AI engineering student with hands-on experience building end-to-end analytics pipelines, fraud detection systems, and risk-aware reporting dashboards. Proficient in Python, SQL, Excel, Power BI, and Tableau with a strong foundation in machine learning, ETL workflows, and anomaly detection. Passionate about data governance, explainable AI, and delivering reliable, insight-driven solutions for business decision-making.

TECHNICAL SKILLS

Programming Languages	Python, SQL, Java (basic)
ML & Deep Learning	Classification, Neural Networks, CNNs, XGBoost, Scikit-learn, TensorFlow, Keras
Data & Analytics	Pandas, NumPy, ETL Pipelines, Anomaly Detection, Explainable AI, Data Quality Monitoring
Visualization & BI	Power BI, Tableau, Matplotlib, Excel (Advanced)
Tools & Platforms	Streamlit, Git, Overleaf

PROFESSIONAL EXPERIENCE

Machine Learning Intern <i>SkillCraft Technology — Remote</i>	July 2025 Verify: SCT/JUL25/1960
---	-------------------------------------

- Applied supervised and unsupervised ML techniques to 3+ real-world datasets, improving model prediction accuracy by iterative feature engineering and hyperparameter tuning.
- Delivered structured performance reports and technical documentation, reducing issue resolution turnaround by streamlining team communication across cross-functional channels.
- Collaborated with the engineering team to identify and resolve 10+ model performance bottlenecks, contributing to a measurable uplift in pipeline reliability and output quality.

Data Analytics Virtual Consultant <i>Deloitte Data Analytics Job Simulation — Forage</i>	2026
--	------

- Built interactive Tableau dashboards analyzing operational data for a simulated client engagement, translating raw metrics into clear, executive-ready visual narratives.
- Automated employee classification workflows using advanced Excel logic, reducing manual categorization effort by an estimated 60% across a dataset of 500+ records.
- Applied structured business problem-solving and data storytelling frameworks modeled on real Deloitte consulting workflows, delivering actionable insights within defined project timelines.

PROJECTS

AI-Powered Fraud Detection System	<i>Python, SQL, XGBoost, Excel, Streamlit</i>
--	---

- Designed a structured data pipeline to monitor high-risk financial transactions, performing root cause analysis on anomalous patterns and classifying fraud risk categories using XGBoost with explainable AI techniques for full audit transparency.
- Built a Streamlit dashboard to visualize real-time risk trends and remediation insights, enabling stakeholders to make faster, evidence-backed decisions on flagged transactions.

End-to-End Retail Analytics Pipeline	<i>Python, SQL, Power BI, Excel</i>
---	-------------------------------------

- Built a complete ETL workflow that ingested and transformed raw retail finance data into validated, analysis-ready datasets with automated data quality checks and error-tracking logic.
- Created Power BI dashboards to monitor reporting accuracy and issue trends, supported by structured documentation of all analytics workflows for reproducibility and handoff.

Cyber Shield — Security Analytics Platform	<i>Python, Machine Learning</i>
---	---------------------------------

- Developed an anomaly detection pipeline that categorized system risk patterns and generated early warning indicators from large-scale datasets, supporting proactive threat identification and structured monitoring workflows.

Medical Image Detection — Oral Cancer & Malaria Detection	<i>Python, TensorFlow</i>
--	---------------------------

- Built deep learning models using CNN architectures applied to healthcare image datasets, achieving high classification accuracy for oral cancer and malaria detection tasks.

CERTIFICATIONS

- | | |
|---|--------|
| • Introduction to Python Fundamentals — Coursera | Verify |
| • Python for Data Science — IBM SkillsBuild | Verify |

- **Microsoft Power BI** — Infosys Springboard Visualization Tools Certification
- **Tableau** — Infosys Springboard Visualization Tools Certification

EDUCATION

Bachelor of Engineering — Artificial Intelligence & Machine Learning
Acharya Institute of Technology

Aug 2022 – June 2026
CGPA: 8.2 / 10.0
