PROFESSIONAL SUMMARY

Data analytics and finance-focused AI engineering student with hands-on experience in data quality monitoring, analytics pipelines, and risk-aware reporting systems. Skilled in Python, SQL, Excel, and dashboard reporting with strong analytical thinking and structured problem-solving. Experienced in documenting data workflows, tracking issues, and generating insights from large datasets. Passionate about data governance, risk monitoring, and building reliable analytics systems for business decision-making.

EDUCATIONAL QUALIFICATION

Bachelor of Engineering — Artificial Intelligence & Machine Learning

Acharya Institute of Technology | CGPA: 8.2

Aug 2022 – May 2026

PROJECTS

• AI-Powered Fraud Detection System

- Designed a structured data pipeline to monitor high-risk financial transactions
- Performed root cause analysis on anomalous patterns
- Built issue tracking logic to classify fraud risk categories
- Generated dashboards to visualize risk trends and remediation insights
- Applied explainable AI techniques for audit transparency
- Tools: Python, SQL, XGBoost, Excel, Streamlit

• End-to-End Retail Analytics Pipeline

- Built ETL workflow transforming raw retail finance data into validated datasets
- Applied data quality checks and error tracking logic
- Created dashboards to monitor reporting accuracy and issue trends
- Supported structured documentation of analytics workflows
- Tools: Python, SQL, Power BI, Excel

• Cyber Shield — Security Analytics Platform

- Developed anomaly detection pipeline to identify data irregularities
- Categorized system risks and tracked issue patterns
- Generated early warning indicators from large datasets
- Supported structured monitoring and reporting workflows
- Tools: Python, Machine Learning

• Medical Image Detection Projects

- Built deep learning models for oral cancer and malaria detection
- Applied CNN architectures to healthcare image datasets
- Tech: Python, TensorFlow

PROFESSIONAL EXPERIENCE

• Deloitte Data Analytics Job Simulation (Forage)

- Completed consulting-style analytics tasks simulating real Deloitte workflows
- Built Tableau dashboards analyzing operational data
- Automated employee classification using Excel logic
- Applied structured business problem-solving and data storytelling
- Machine Learning Intern, SkillCraft Technology (Remote) – July 2025
- Applied ML techniques to real-world datasets.
- Assisted in documentation, reporting, and performance tracking.
- Collaborated on issue resolution and optimization. <https://skillcrafttech.com/verify?id=SCT/JUL25/1960>

CERTIFICATIONS

- **Introduction to Python Fundamentals (Coursera)** : -<https://www.coursera.org/account/accomplishments/verify/9UUL6EP8XEPD>
- **Python for Data Science:-** <https://courses.skillsbuild.skillsnetwork.site/certificates/b093b2f9c89445ab93fbc95d7d255305>
- **Infosys Springboard Visualization Tools: Microsoft Power BI , Tableau Certifications**

TECHNICAL SKILLS

Programming: Python, SQL, Java (basic)

Machine Learning: Classification, Deep Learning, Neural Networks

Libraries: Pandas, NumPy, Scikit-learn, TensorFlow, Keras

Visualization & Reporting: Excel (advanced), Power BI, Tableau, Matplotlib

Tools: Streamlit, Git

Concepts: ETL pipelines, anomaly detection, explainable AI

SOFT SKILLS

- Analytical problem-solving
- Structured documentation
- Attention to detail
- Risk-aware decision making
- Cross-team collaboration
- Learning agility

LANGUAGES KNOWN

- English
- Hindi
- Kannada
- Telugu
